DETAILED ACTION

Restriction

This application contains claims directed to the following patentably distinct species of the claimed invention:

Group I, claims 1-17 directed to a species of zoom lens comprising, in order from an object side, a negative, positive, negative, positive lens structure and satisfies the conditions regarding the most object side negative lens.

Group II, claims 18-28 directed to a species of zoom lens comprising, in order from an object side, a negative, positive lens structure, wherein a third lens unit can be either negative or positive, all first to third lens units move during magnification and further satisfies the conditions regarding the most object side negative lens.

Group III, claims 29-34 directed to a species of zoom lens comprising, in order from an object side, a negative, positive lens structure, wherein the positive second lens unit consists of two positive and one negative lens and further satisfies the conditions regarding the first and second lens units.

Group IV, claims 35-60 directed to a species of zoom lens comprising, in order from an object side, at least a negative, positive, negative lens structure and satisfies the conditions regarding the first and second lens units.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 35 is generic in regards to Group IV.

Art Unit: 2873

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
